Write-up of the FDP on Electives in CBME

10-11-2026, 3 to 4 PM, Miller's learning hall, Department of Medical Education.

The Department of Medical Education, Narayana Medical College, Nellore, successfully organised a faculty sensitization session on 'Electives in CBME' in view of the commencement of the 14-day Electives Posting programme in November 2026.

The programme commenced with the opening remarks by Dr. V. Mahidhar Reddy, MEU Coordinator, Professor & HOD, Department of General Surgery, who highlighted the importance of structured electives in providing undergraduate medical students with opportunities for experiential learning, professional development and exploration of areas of interest beyond the conventional curriculum.

Dr. B. Madhavulu, MEU Co-Coordinator, Professor & HOD, Department of Pharmacology, served as the resource person. He provided an overview of the NMC Electives Document and discussed the essential aspects of organising electives, effective planning and supervision of student activities, defining preceptor responsibilities, and ensuring proper documentation and maintenance of the Electives Logbook.

The session was attended by all Heads of Departments, accompanied by one additional professor from their respective departments, ensuring representation and active participation from all departments involved in the Electives Posting programme.

An interactive discussion followed the presentation, during which faculty members shared their experiences, discussed practical challenges in implementing electives and maintaining the Electives Logbook, and exchanged suggestions for improving the overall learning experience of students.

The programme concluded with closing remarks by Dr. P. Sreenivasulu Reddy, Dean of NMCH, who emphasised the importance of coordinated departmental efforts and faculty commitment in ensuring the effective implementation of the Electives Posting programme.

The session was a constructive initiative towards strengthening faculty preparedness, promoting uniformity in the conduct of electives across departments, and ensuring meaningful, structured and student-centred learning experiences in alignment with NMC guidelines.

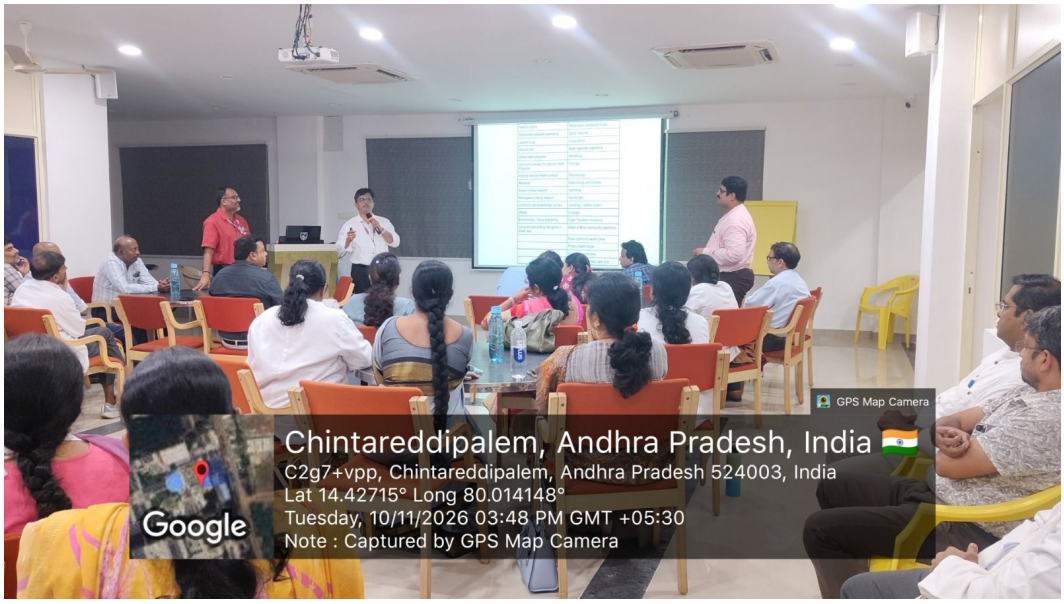

more than by what they SAY.
