CME on Carcinoma Breast & Core Needle Biopsy Workshop

Department of General Surgery | Narayana Medical College, Nellore
Date: 24th October 2026

The Department of General Surgery, Narayana Medical College, Nellore, in association with Sun Pharma, successfully organised a Continuing Medical Education (CME) programme on **"Carcinoma Breast & Core Needle Biopsy Workshop"** on 24th October 2026 at the Dr. T. Seshachalam Hall of Surgical Excellence. The programme was organised as part of the observance of Breast Cancer Awareness Month – October, with the objective of updating clinical knowledge and enhancing practical skills in the diagnosis and management of breast cancer.

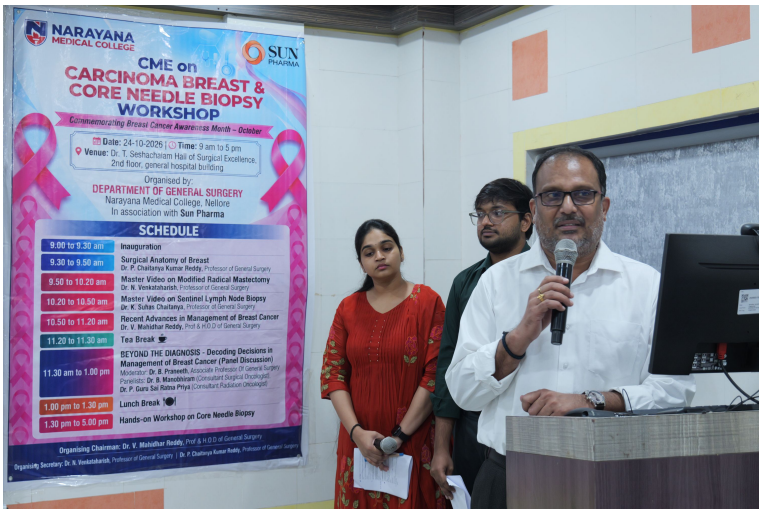

The academic programme featured a series of expert lectures and surgical video demonstrations covering important aspects of breast cancer management. The sessions included Surgical Anatomy of the Breast, a master video demonstration of Modified Radical Mastectomy, Sentinel Lymph Node Biopsy and Recent Advances in the Management of Breast Cancer by Dr.Chaitanya, Dr.Harish, Dr.Suhas and Dr.V.Mahidhar Reddy respectively. These sessions provided valuable insights into contemporary surgical principles, evolving treatment strategies and evidence-based approaches to breast cancer care.

A major highlight of the CME was the panel discussion titled **"Beyond the Diagnosis – Decoding Decisions in Management of Breast Cancer."** The discussion was moderated by Dr. B. Praneeth, Associate Professor, with Dr. B. Manobhiram, Consultant Surgical Oncologist, and Dr. P. Guru Sai Ratna Priya, Consultant Radiation Oncologist, as panelists. The interactive discussion explored the nuances of multidisciplinary decision-making in breast cancer management, emphasising the integration of surgical oncology and radiation oncology in individualising patient care.

The programme concluded with a **hands-on workshop on Core Needle Biopsy**, providing participants with practical exposure to this important diagnostic procedure. The workshop emphasised the role of tissue diagnosis in the evaluation of breast lesions and the importance of accurate and timely diagnosis in planning appropriate treatment.

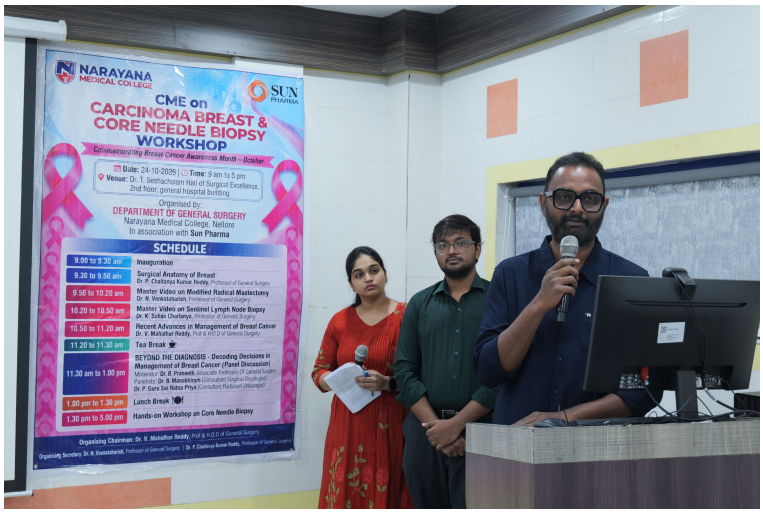

The programme was organised under the leadership of **Dr. V. Mahidhar Reddy, Professor & Head, Department of General Surgery**, who served as the Organising Chairman. Dr. N. Venkataharish, Professor of General Surgery, and Dr. P. Chaitanya Kumar Reddy, Professor of General Surgery, served as the Organising Secretaries.

The CME served as a valuable academic platform for knowledge exchange, clinical discussion and skill enhancement, reinforcing Narayana Medical College's commitment to continuing medical education, evidence-based clinical practice and improved breast cancer care.
