REPORT ON WORLD TUBERCULOSIS (TB) DAY-24.3.2026

The NSS Unit of Narayana College of Nursing organized a Tuberculosis (TB) Awareness Program on the occasion of World TB Day under the guidance of **Dr. B. Vanaja Kumari, Principal**. The program was coordinated and conducted by **Mrs. S. Suchitra**, NSS Coordinator, in collaboration with the **Damien Foundation**.

The main objective of the program was to create awareness among students and the community about Tuberculosis, its causes, prevention, and treatment.

The program began with a prayer song followed by a welcome address. As part of the awareness initiative, a **rally** was organized in which **50 NSS volunteers actively participated**, carrying placards and raising slogans to spread awareness about TB prevention and control among the public. The rally played a significant role in educating the community about early diagnosis and treatment.

Various activities were conducted to make the session informative and engaging. A live demonstration was presented to explain the spread of TB, helping participants understand how the disease transmits from person to person.

A puppet show was performed to deliver awareness messages in an interesting and easy-to-understand manner. Students also participated in a poster presentation highlighting the causes, symptoms, prevention, and treatment of TB.

Health education was provided focusing on the importance of nutrition and diet for TB patients, emphasizing the role of healthy food in recovery.

A special highlight of the program was the guest lecture by **Dr. Shanthi, Medical Officer from Damien Foundation**, who delivered an informative session on TB. She explained in detail the signs and symptoms of TB, preventive measures, treatment procedures, and the importance of proper care and nutrition during recovery.

The program concluded with a vote of thanks expressing gratitude to the chief guest, principal, faculty members, and students for their active participation, followed by the National Anthem.

At the end of the program, **snacks were distributed to all NSS volunteers and the public** as a token of appreciation and participation.

Overall, the program was successful in spreading awareness about TB and educating participants on the importance of early diagnosis, treatment, and prevention.
