

Report on

"Skill Development"

A seminar on "Skill Development for Students Pursuing Master of Computer Applications (MCA)" was conducted on **26-09- 2023**, at the Department of Computer Applications, NECG. The seminar aimed to equip students with essential technical and soft skills to enhance their employability and industry readiness. The primary objectives of the seminar were To highlight the importance of skill development in the IT industry, To introduce students to the latest tools, technologies, and trends in software development, To provide hands-on training and interactive sessions to improve practical knowledge. To enhance communication, teamwork, and problem-solving skills. Resource person Focused on programming languages, frameworks, and tools such as Python, Java, Angular, and Git. Demonstrations on cloud computing, AI, and data analytics. Emphasis on communication, teamwork, and leadership skills. Activities including group discussions and mock interviews. Also Practical exercises on mobile app development and web designing.

The seminar saw active participation from over 101 MCA students. Feedback collected indicated 85% of attendees rated the sessions as "Highly Informative."The outcomes are

- Improved understanding of current technologies and tools.
- Better awareness of soft skills essential for professional growth.
- Opportunities for networking with industry experts and peers.

The seminar successfully achieved its goals by enhancing both technical and interpersonal skills among MCA students. The organizing committee extends gratitude to the speakers, participants, and volunteers for making the event a resounding success.
